Technical information below. @Giulio: it's fine to ignore

On my laptop, i noticed that the sequence (responsible for auto-increment of the primary key) was strange.

So, a fix would be (note that on my laptop, i deleted the records and imported, so this needs to be tested on server):

```
SELECT MAX(id)+1 FROM avsm_misc.optical_fiber; -- Return 319
ALTER SEQUENCE avsm_misc.optical_fiber_id_seq RESTART WITH 319;
ALTER TABLE avsm_misc.optical_fiber ALTER id SET DEFAULT nextval('avsm_misc.optical_fiber_id_seq');
```

Fixed also some related issues ([5e93e043](#)).

- Status changed from New to Resolved

Shapefile import OK.

The new admin baskets might need other rounds of fine tuning, but we'll get there.
