<b>Description</b>			
<p>The raw points are in WGS84. That probably explains the issue you noticed with the surveyor data not being assigned after importing the line work.</p> <p>They were the only import done after the beginning of the lock-down, and were imported still with the old admin.</p> <p>We need to sort this out, like:</p> <ul style="list-style-type: none"><li>- clean up the database</li><li>- reproject the raw survey points file</li><li>- import that reprojected file</li><li>- re-import the line work layers</li></ul> <p>Note this also coincides with the new admin baskets.</p>
