Description Here is the excel file with the details of wells, as on 14.07.2020. All data in this "masterfile" will be stored in the database, as discussed yesterday. In the excel file there is one tab with explanations of what fields are. The fields marked with blue color won't be published in the main interface. In case there will be a csv file to download, all fields can be there (to be discussed)
