Target version:		Spent time:	0.00 hour
Description Survey point imports are not reprojected to accurate GPS coordinates. Example: in QGis, V_WMNG_PIPP id 655058355 is about 26 meters from RAW_V_WMNG_PIPP id 655058355.

#2 - 30/08/2020 14:41 - Philippe May

- Subject changed from Reprojection issue with raw points to Import issue with raw survey points

Problem identified as a goof up in the piece of code for creating points on the map (V_* layers) from raw survey points. It's not an issue with reprojection, but with a mix of coordinates between points in the file to be imported.

#3 - 30/08/2020 14:45 - Philippe May
