#### Description

Dear Philippe,  
I received an email from Eric Chacra yesterday, please find it below

Little bug on the graph "Average rainfall by month of the year"  
The months disappear when you zoom the content of the graph.

The graphs displayed surface on the page is too small for me (of course I can zoom in the page but another little bug prevents me to scroll horizontally the page, vertically is ok) - the content (all the lines), even if I zoom in the lines related to the rain gauges is too small to really appreciate what's going on.
