Target version:		Spent time:	0.00 hour
Description			
<p>Courage well: the survey took 3 points on the casing: the three points define a circle (the casing), the center of the circle is a point which needs to be created by Raj, which will have the code of Borewell.</p> <p>Inside the casing there are 2 pipes (from Auroville Water Service), because there are 2 separate pipelines and 2 pumps: during the survey (03.02.2022) one point for each pipe has been measured. When these data will be published, then a tag shall be created for each of these 2 AWS points, describing that these are two separate pipes for separate water distribution</p>
