GIS - Bug #13885

Wrong name showing in the list of layers in the map

Description

I tried twice to create a new survey category (Proposed Shed, Status F, name B65) and it was created. But both times, in the list of Building Layers in Gisaf map, instead of the usual "Shed" the newly created "Proposed shed" appeared, with the same number of features as the shed (378 features) but not visualizing them.
It is a category which should not show in the map layers list, as it is used for the status "F" (as we have done for other categories as well), but this time it behaves differently...

- Status changed from New to In Progress

Quick update: i found the problem and working on it.

#2 - 12/04/2022 11:04 - Philippe May

The issue is fixed and applied on the server.

But, i then found that there's another related issue related to layers with different statuses. It's only a problem of styling in the map and not blocking.

See #13901 for details.
