Description

This morning I tried to open Gisaf, but it looks it is hung again...

Please let me know if I need to do anything about the physical server

History

#1 - 30/04/2022 14:01 - Philippe May

- Priority changed from Urgent to High

- Status changed from New to In Progress

Just restarted the gisaf service and it's OK now.

But i still don't know what is the root cause. Maybe related to #13985. Keeping this ticket open until i have found the reason behind these freezes.
