<b>Description</b>			
Fonts for each symbol have been created, using Birdfont. It would be nice to use them to display features in Gisaf map. But the font needs to be installed into Gisaf first, and I don't know how to do it...			

#### History

- Assignee changed from Philippe May to Giulio Di Anastasio

There's only one font file for all map symbols. It's part of the source code so i'll have to do that.

Can you attach the file(s) here?

I'll also try to pass by Geomatics office soon.
