Description			
In CSR Weather Station, daily rainfall on 26 september 2020 is reported to be 499.3, on 1 October 2020 is 551, on 18 october 2020 is 596 (see attached screenshot) There is some weird computation happening, as there were never such high rainfall

- File Sunship.png added

I still see that the CSR weather station rainfall for those days did not change. I noticed also that a similar problem is for the Sunship weather station (see attached file), for the 18 october 2020, with 584.8 mm of rain on that day...
