Target version:		Spent time:	0.00 hour
Description CSR Weather Station stopped working on the 2nd of August 2023, at 12:21 pm. After that, there is another reading on the 10th of September at 10:07 am. No further readings are recorded in our database (Sorry by mistake I deleted the previous ticket no. #15191 and I don't know how to recover it...)

Perhaps Philippe can look if data are getting saved into Ambient Weather server...

#2 - 12/10/2023 14:32 - Giulio Di Anastasio

First step would be to check if data have been stored in Ambient weather database after the console stopped working, in august 2023 and finally in september 2023.

OPTIONS:

Perhaps we can contact the support in Ambient Weather website (<https://ambientweather.com/>)

To buy a new console (<https://ambientweather.com/ws-2902c-console>):

price is about 77 USD (6,500 INR) + import taxes (96 USD) + shipping rate FedEx 34 USD totalling about 207 USD (18,000 INR)

To buy a new weather station:

model WS-2902 (<https://ambientweather.com/ws-2902-smart-weather-station>) is 190 USD (about 16,000 INR) + import taxes (218 USD) + shipping rate FedEx 78 USD totalling about 486 USD (40,500 INR)

model WS-2000 (<https://ambientweather.com/ws-2000-smart-weather-station>) is 300 USD (about 25,000 INR) + import taxes (305 USD) + shipping rate FedEx 78 USD totalling about 682 USD (57,000 INR)(THIS LOOKS THE BEST ONE but the price is a bit high...)

model WS-5000 (<https://ambientweather.com/ws-5000-ultrasonic-smart-weather-station>) is 450 USD (about 37,500 INR) + import taxes (431 USD) + shipping rate FedEx 84 USD totalling about 965 USD (81,000 INR)
