Gisaf - Bug #15225

Duplication of well readings

12/10/2023 14:42 - Giulio Di Anastasio

Status:	In Progress		**Start date:**	12/10/2023
Priority:	Normal		**Due date:**	
Assignee:	Giulio Di Anastasio		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:			**Spent time:**	0.00 hour

Description
While entering new well readings, since a few days the reading value for any well gets stored twice in the database (see attached screenshot)

Yes please. Kindly inform me when it restarts, as Raj is working on it. Thanks

#4 - 12/10/2023 19:42 - Philippe May

I think, as you suggested, that this issue is resolved along with [#15224](). Can you please confirm?

Also, for cleaning the double entries made so far - there shouldn't be too many as the problem started when i did some updates, around 2 weeks ago: you said that you can do that manually from the database (with the old admin, QGis or pgadmin), right?

#5 - 12/10/2023 20:10 - Giulio Di Anastasio

I will check it out tomorrow morning. Don't worry about the double entries, I will clean them out. Thanks!!
