

GIS - Support #15345

Add permissions to the database to Selvarani

06/02/2024 16:00 - Philippe May

Status:	Resolved	Start date:	06/02/2024
Priority:	Normal	Due date:	
Assignee:	Selvarani C	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
After a discussion about the decommission of the "old admin", it was agreed to give Selvarani enough permissions on the database so she can use pgadmin as a replacement.			

History

- #1 - 06/02/2024 16:22 - Philippe May
- Assignee changed from Philippe May to Selvarani C
  - Status changed from In Progress to Resolved

So far, Selvarani's access to the database consists of:

- a role "readonly" (which allows to view all the data, eg the raw survey data)
- all permissions on 2 tables: well and category.

Giulio has basically all the permissions to every table.

So have applied the same to Selvarani. With a word of caution: with great powers comes great responsibility! smirk.png

@selvarani: Can you please check with pgadmin?

- #2 - 06/02/2024 16:38 - Selvarani C
- I have checked in well\_level Table, i can add and delete the row.  
Thank you
