

bung - Feature #1704

Create script for more sophisticated backup file retention

24/12/2015 14:08 - Charles Atkinson

Status:	New	Start date:	24/12/2015
Priority:	Normal	Due date:	
Assignee:	Charles Atkinson	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			

Description

The current scripts' retention mechanism is to keep files up to a configurable number of days.

The new script will initially:

- Keep all files for a configurable number of days
- Keep the first and last files of each day for a configurable number of days prior to that
- Keep the first and last files of each month for a configurable number of months prior to that (maybe)

Priority is high because the feature is wanted for use with the newly implemented MySQL replication

History

#1 - 24/12/2015 15:55 - Charles Atkinson

- Decided on script name: delete_old_bu
- Wrote man 5 page, intended to act as the specification

#2 - 24/08/2020 06:18 - Charles Atkinson

- Priority changed from High to Normal
