Description

Dear Philippe,
I attach herewith the followings:

Weather Station details
2013 Data
2014 Data
2015 Data
2016 Data

For 2013, data start from October. In 2016, data end in September, we will update as soon as I will receive them. Hope ok for you.

In some of the tables, there are few cell values = NULL. Can we retain the NULL values?
I'd like to retain because there will be a note explaining why it is NULL, as under:
"_NULL values occur in the table where a valid observation is not available. This is frequently associated with a failure in the observing equipment, or when an event has produced suspect data._"
