<b>Description</b> Dear Philippe, I uploaded the updated excel file of wells level in the basket.  When trying to import, I got the error  Error importing: ""  The same error I got when I tried to import the new shapefile of wells, which first I uploaded in the basket.  I attach here both the files, for your reference  Waiting for your update, thanks  Giulio

##### Revision 31b068f6 - 19/01/2017 15:34 - Philippe May

Fixes #3515: map attributes to table column names when importing; also fix an issue with the map when a style for this layer is empty

- Assignee set to Giulio Di Anastasio

You need to indicate the table name (well for the shapefile, well\_level for the data): click on the pencil icon and you'll get a form with a drop down menu.

When you import a file in the basket, that drop down menu appears so there's no need to go to the pencil icon road.

Ideally, i'll get the software to issue a better error message.

##### #2 - 19/01/2017 12:47 - Philippe May

I've just seen you've put the table names.

For the data file: OK.

For the shapefile: there's an error message (Error importing: "Entity '<class 'gisaf.models.Well'>' has no property 'wellcode'"), i'm checking now and will get back to you.

##### #3 - 19/01/2017 13:00 - Philippe May

I think there's a bug: the names of the fields (wellcode) have changed recently.

Sorry for that, working on it.

**#4 - 19/01/2017 15:40 - Anonymous**

- Status changed from New to Resolved
- % Done changed from 0 to 100

Applied in changeset [gisaf/31b068f6d7a22b7a523460325523c3f500ba6d4a](#).

**#5 - 19/01/2017 15:42 - Philippe May**

Hopefully it's fixed. I tried on my machine and on the test environment with success.  
Giulio, I'll let you try on the production site.
