Description

Dear Philippe,
I have now 2 cases where wells are dry.
I don't know how to represent them in the graph and which kind of data to enter. Can we look into it?

Thanks

Regards

GIulio

Right, the well water level is a number.

So, we could add another field for well level readings, along with the level (numerical value): dry (Yes/No).
Hopefully, the default should be "No".
If the user selects "Yes", the numerical level entry should be disabled.
