Description			
Dear Philippe, In the Basket, if I click on any file or folder, instead of viewing the content, I get an "Internal Server Error". Please have a look into it.			
Thanks

Switching to venv (from the old style virtualenv) on the server slightly changed the configuration.
Hopefully, i had put an option to manually set the base of the baskets:

```
root@gis.gis:/etc/gisaf# cat prod.cfg
[DEFAULT]
basket_root = /home/phil/gisaf_src/gisaf/import_basket

[db]
uri = postgresql+psycopg2://avgis:avgis@server.gis.av:5432/avgis
```
