Description			
Dear Christian and Philippe, I was able to add new wells to the shape file but not able to add new fields like depth, bottom formation etc to it. We are planning to add some fields so please look into this. thank you

- Target version set to poll

Any Update on this?

#5 - 02/12/2017 12:31 - Philippe May

I added a field "depth", as discussed with Giulio earlier this week ([7b5d5fef](#)).

Checking the attached file, i could not see any other field to add.

About the bottom formation: isn't that the geological formation? In this case, wouldn't it be better to be computed from the location of the well, and the geological formation layer?
