Description
facing the issue of not being able to login frequently into GISAF. Sometimes i can but there is no pattern.

Associated revisions

Revision 259999f8 - 19/12/2017 06:19 - Philippe May

Fixes #4944: Make the 2 "applications" (user and admin) use the same auth backend; don't open tab for admin; remove login/logut buttons in admin; add button in admin to go to main GUI

Issue resolved, Please close the ticket. Thanks!

#2 - 15/12/2017 15:04 - Philippe May

I never experienced issues logging in.

The issue persists if i login from the dashboard. Tried login in the basket, worked this time. :-)
Resolved!

#5 - 16/12/2017 11:43 - Philippe May

I think i understand what's happening now.

The 2 "sides" of the software (1/ the user interface, with the map and graphs, and 2/ the admin pages) have different authentication mechanisms.
It's in my pipeline to have the 2 parts working together (i'll create a ticket, there are technical issues to be solved depending on an external library... patience).

I'm sorry if it's a bit confusing. As of today, just remember to log in on the "admin" side, until i can sort this out.

Ok, i didn't realize it earlier because i used to use sometimes the user interface and sometimes admin part. no issues. Can close it for now.thanks!

#7 - 18/12/2017 18:26 - Philippe May

- Subject changed from GISAF login Problem to Make the 2 "applications" (user and admin) use the same auth backend

- Tracker changed from Bug to Feature

- Status changed from Feedback to New

The Angular application should use jwt (angular2-jwt)

What does this mean?

#11 - 19/12/2017 11:53 - Philippe May

It's a tech note sunglasses.png
You van ignore these
