Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Create another basket for reconciliation of survey points: eg. from RAW_V_SRVY_ELVY to RAW_V_ROAD_CYCL .			
This comes as a "patch" on the workflow, when points are marked in the survey in one category, and later on that category is changed.			
A new table be be created: raw_survey_reconciliation, with columns:			
- id: the id of the point generated by Gisaf when importing the raw survey CSV file			
- target: the name of the model (layer) to move the point to
