Description			
Task #5975 "Excel file with email ids of residents" made the spreadsheet accessible on the Internet because the Redmine project GIS was public. I (Charles) have removed the public setting pending removal of the attachment.

Good catch. I removed the culprit file in [#5975](#).

For information, how did you find this issue, Charles?

Dev reported it to Chandresh giving a google.com link so presumably he had found it by a Google search.

FYI he also reported "AV Communities phone and mail details.xlsx". Wide searching did not find that. It disappeared after running [rake redmine:attachments:prune](#), now set up as a daily cron job.

Do you want project GIS to be made public again?

Long pending issue. It looks like there's no file in this Redmine project which raise confidentiality issues, no i just put it public again.
