Description

Mail from Luca dated 03.08.2018

Dear friends,

Aws has met with Jeanne L., we have given her all historical water distribution available and what available as water extraction data.

We have explained a lot of details of the data collection process and practical accuracy related problems for this kind of work, the meaning of the voice 'water losses' etc., she noted all that, please give a look to that too.

Greeting,

L.
