Target version:		Spent time:	0.00 hour
Description			
Server seems to hang			

History

#1 - 04/02/2019 16:31 - Philippe May

- Status changed from New to Resolved

Looking at the server logs and config:

- swap isn't active on start (swapon -a does the trick)

- memory, which was reduced to 1GB, seems to be a bit short for this kind of relatively massive import => increased it to 1.5GB.

With these settings, the import is successful.
