

Gisaf - Bug #7584

Error with large integers (graphql)

06/02/2019 16:05 - Philippe May

Status:	In Progress	Start date:	06/02/2019
Priority:	Normal	Due date:	
Assignee:	Philippe May	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
Eg: when the id of a feature is more than 2147483647 (graphene.types.scalars.MAX_INT), the information isn't displayed.			
See https://docs.graphene-python.org/en/latest/types/scalars/ for a discussion: there's a confusion between the graphql Int specs (max: $2^{32} - 1$) and the IEEE Int spec ($2^{53} - 1$)

Use strings for id (Refs #7584)

History

#1 - 21/08/2019 09:53 - Philippe May

This same issue impacts the selection and plugins tool, obviously, because they all use graphql fetched data. With plugins, a simple workaround was to use a string type for ids.
