GIS - Feature #9220

Setting the daily resampling of weather data starting from 8.30 am

31/10/2019 12:00 - Giulio Di Anastasio

Status:	Resolved		**Start date:**	31/10/2019

Description

We need to set the starting time for daily resampling of weather data, at 8.30 pm, because all raingauges are measuring rainfall at 8.30 am, otherwise readings will be not comparable

- Status changed from New to Resolved

Done, but there's some implied considerations to consider.

Eg: the bar graph mimics the collection of water the next day at 8:30AM, so the bar with resampling per day don't match the samples.
